

SR SCALP & FOLLICLES REVITALISATION

*Awaken Your Follicles,
Restore Your Youthful Confidence*

SR SCALP & FOLLICLES REVITALISATION (SFR) offers a targeted, bioactive approach to hair health for those experiencing thinning hair, dormant follicles, or a weakened scalp environment. Powered by stem cell-derived growth factors and advanced nano peptides, this formula nourishes hair follicles at the root, supports your natural hair growth cycle, and encourages new, healthier strands to emerge.

By delivering essential nutrients right where they're needed, SFR helps reactive underperforming follicles and creates the ideal environment for lasting hair vitality.

KEY INGREDIENTS

SR SCALP & FOLLICLES REVITALISATION (SFR) with a proprietary blend of Hair Growth Factors derived from stem cells. This bioactive extract contains naturally sourced peptides that help activate sleeping follicles and support them through every stage of the growth cycle. With a low molecular weight (10 kDa), its nano-peptides penetrate deeply into the scalp to target follicle regeneration at the source. SFR is free from chemicals, preservatives, and harmful contaminants, making it a clean, body-friendly solution for hair restoration.

6 KEY GROWTH FACTORS IN SFR:

PLATELET-DERIVED GROWTH FACTOR

Activates the anagen (growth) phase by stimulating dermal papilla cells and follicle regeneration

FIBROBLAST GROWTH FACTOR

Aids follicle regeneration and angiogenesis, improving nutrient and oxygen delivery.

EPIDERMAL GROWTH FACTOR

Boosts keratinocyte and follicular cell proliferation for thicker, denser hair.

VASCULAR ENDOTHELIAL GROWTH FACTOR

Enhances scalp microcirculation to support healthy, active follicles.

INSULIN-LIKE GROWTH FACTOR

Extends the growth phase, supports follicle survival, and promotes hair shaft elongation.

TRANSFORMING GROWTH FACTOR BETA

Regulates the hair growth cycle, balancing growth, regression, and rest phases.

WHO IT'S FOR?

- Adults experiencing hair thinning, reduced hair density, or visible scalp areas.
- Individuals with dormant or underactive hair follicles seeking to stimulate new growth.
- Individuals with sensitive scalps who require a hypoallergenic hair care solution.
- Those looking to strengthen existing hair and improve overall hair resilience.

SR SCALP & FOLLICLES REVITALISATION (SFR)

Give your hair the targeted nourishment it needs. Experience the power of stem cell-derived growth factors and advanced nano peptide technology for a healthier, fuller head of hair!

SWISS
REVITALISATION

KEY BENEFITS

- ✓ **Follicle Reactivation**
Stimulates dormant hair follicles to re-enter the active growth phase, encouraging the emergence of new hair in thinning areas, bald patches, and receding hairlines.
- ✓ **Stronger, More Resilient Hair**
Nourishes hair strands from the root, supporting healthier, fuller, and more robust hair that is better equipped to withstand daily wear and environmental stressors.
- ✓ **Prolonged Anagen Phase**
Extends the hair growth phase (anagen), allowing follicles more time to produce longer, denser hair before transitioning into the resting and shedding phases.

- ✓ **Scalp & Follicle Nourishment**
Delivers essential nutrients directly to the scalp environment, supporting the health of follicular structures and creating optimal conditions for sustained hair growth.
- ✓ **Superior Bioavailability**
Low molecular weight nano peptides (10 kDa) penetrate the scalp efficiently, maximizing the absorption of growth factors into the hair follicles for enhanced effectiveness.
- ✓ **Clean & Gentle Formulation**
Hypoallergenic and suitable for sensitive scalps. Free from preservatives, parabens, alcohol, and animal testing — a high-performance formula you can trust.

SR SCALP & FOLLICLES REVITALISATION (SFR) Kit:

- 2.5ml x 5 vials
- MicroNed Stamper (5ml)
- Dropper

The EW Biomedical MicroNed Stamper is available in:

Packaging Info	Needles Length (mm)
Home Treatment	0.25 mm, 0.50 mm, or 0.60 mm
Professional Use (Use with caution)	0.50 mm, 0.60 mm, or 0.75 mm

Needles Length Description

0.25 mm

- Boost transdermal absorption of topical products
- Gently stimulate circulation and trigger mild mechanical stimulation of hair follicles
- Mild tingling sensation, no pain or discomfort
- Suitable for beginners and recommended for bald areas

0.50 mm – 0.60 mm

- Boost transdermal absorption of topical products
- Trigger mild collagen growth and activate growth factors in the hair follicle area
- Moderate discomfort, tolerable for most users
- Not suitable for beginners and recommended for use on hairy areas

0.75 mm

- Boost transdermal absorption of topical products
- Strong stimulation of hair follicles and induces collagen growth
- Moderate to high discomfort
- For professional use and recommended for use on hairy areas.

⚠ IMPORTANT: MicroNed Stamper should not be used without medical guidance during pregnancy; by individuals with hemophilia or conditions affecting wound healing; those taking anticoagulants; or on scalps with fresh wounds, open lesions, or active acne.

RECOMMENDED USAGE

SR SCALP & FOLLICLES REVITALISATION (SFR) is designed for use with the EW Biomedical MicroNed Stamper — a microstamping device for safe, convenient at-home application. Microstamping creates controlled micro-punctures on the scalp that enhance the penetration of bioactive ingredients into the hair follicles, stimulate localized blood circulation, and activate follicular stem cells to support hair regeneration.

DIRECTION OF USE

Frequency: Once weekly during the first month; twice weekly from the second month onward. Adjust based on individual scalp tolerance.

- 1 SANITIZE**
Sanitize the MicroNed Stamper with 75% alcohol before use.
- 2**
Transfer the HFR Extract into the MicroNed Stamper bottle and shake gently to mix.
- 3**
On a clean, dry scalp, position the device over the target area (thinning hairline, bald patches, or temples).
- 4**
Move the device horizontally while applying vertical and diagonal stamping motions for 3–5 seconds per area.
- 5**
Apply sufficient pressure to allow mild penetration — a light tingling sensation is normal and should not cause pain.
- 6 STERILIZE**
After use, rinse the device with water, sanitize with 75% alcohol, and let it dry completely before storing.

➔ Possible Side Effects

- Mild, temporary effects may occur due to the micro-puncture process, including redness, swelling, tingling, itching, minor irritation, or small bruises. These typically resolve within 3–5 days.
- **To manage:** cleanse gently with lukewarm water and mild shampoo, avoid scratching, and consider soothing serums (aloe vera or hyaluronic acid). Cold compresses can reduce swelling. Avoid harsh treatments, chemical dyes, heat styling, and excessive sun exposure for a few days post-treatment.
- Seek medical attention if you experience persistent redness, pain, excessive swelling, signs of infection, or prolonged bleeding.

➔ Contraindications:

Not suitable for individuals with known allergies or hypersensitivity to leporine or leporine-derived ingredients.

➔ Storage:

Store between +4°C and +16°C, protected from direct sunlight, heat, and moisture.
